'Creative Process'

- creating visually exciting paintings -

17th - 20th January

(4 days) workshop at my Buderim studio - Sunshine Coast

Day 1..

We will pull apart the entire creative painting process into manageable steps so you can easily understand and apply them.

Days 2, 3, 4..

Once we all have the creative process fundamentals sorted, then you jump straight into your very own 'painting fantastic' where you will apply what you have learned over the remaining three days.

You will learn:-

- Fundamentals of the creative process
- Understanding and applying good composition
- What makes a great painting and how to achieve.?
- How to prepare and get started.?
- Essential techniques explained and then applied
- How to interpret photo reference. What to use and what to leave out and why.?
- Apply your new creative process for a wonderful, visually exciting painting.

The Process:- I explain, demonstrate and we get started with some practice painting to consolidate and understand the new concepts and techniques before moving forward to your major workshop paintings.

Next - Painting Fantastic:- We will then dedicate 3 whole days to painting your own fantastic painting or paintings. I will be spending lots of time with you, one-on-one to make sure you understand the process, execution and development of all the painting concepts and techniques. I will also be doing live demos to show you how I do it and am with you every step of the way to help and assist whenever needed so that you really get a huge heads up with every aspect of your painting process including how to use and get the most from colour, paints, mediums, including good brush techniques. Every day filled with heaps of great tips and tricks not found in books.

I would love to see you there and share some fantastic creative painting time together so please let me know ASAP to secure your place or get more information.
